

## SUMMARY OF CAPABILITIES

Our focus is to provide quality process equipment with excellent customer service. We use our 40 years of experience to integrate all phases of a project to provide a higher level of value. I have listed a brief summary of our services below....

- Custom Industrial Process Equipment
  - o Design Build / Build to Design
    - We have been building production equipment for over 40 years from food lines to rubber lines and delivered jobs as far as China and Egypt.
- Metal Fabrications
  - o Structural Steel
  - o Miscellaneous Metals – Bollards, Stairs, etc.
  - o Heavy Weldments
  - o Tanks, Cylinders, Towers
  - o Dumpers
  - o Conveyors
  - o Repairs
- Machining (Tool & Die)
  - o Design and machining of custom parts
  - o OEM Replacement parts and repair
  - o Jigs, fixtures, etc.
  - o Industrial and Construction related repair
    - Heavy Equipment Repair
    - Boring and Bushing,
    - Spray Metalizing or Welding and Turning Shafts, etc.
  - o Large Capabilities (See Equipment Capabilities)
- Sheet Metal
  - o Custom Sheet Metal Parts
    - Funnels and Conveyor Chutes
    - Tanks
    - Containers and Baskets
    - Shelving, Lockers
    - Customer small items
  - o Electrical Panels
  - o Ductwork
- Electrical
  - o Electrical Panels
  - o Custom control wiring
  - o Equipment Installation and Control Programming
- Equipment Installation
  - o Installation of our Process Equipment

- Tear Down of old equipment
- Tear Down and Rebuild
  - We have torn down, repaired and reinstalled work all over the Midwest for automated equipment, heavy repair on bridges and factories, and more.
- Engineering
  - Project management and integration
  - Part Design, Welding Jigs, Fixtures, and equipment design
  - Safety guided design principals and consultation
  - Weld process and mechanical engineering
  - Part fitting and tolerance knowledge to help you get your operations running smoothly.
  - Process line design
    - Curelines
    - Overhead conveyors
    - Open top and closed top conveyors
    - Accumulation systems and Wig Wag Units
    - Dumpers
    - Presses
    - Automation.
      - Product movement
      - Assembly
      - Filling and capping stations
      - Motion sensing
      - Vision Systems
      - Safety (light curtains, etc.)
      - And more!

Increase your uptime and enhance product design!

Engineers Make Things....

Huffman Engineers Make Things Work!!!

- Supply
  - Industrial Supply Store
    - Used for our sales team and local customers and is a valuable resource in having parts for quick turn key projects.
  - Huffman's Farm & Home
    - Adds more resources for our customers and for us to use in our ability for quick turn key projects
